DETAILED ACTION

1. This office action is in response to the amendment filed on 5/2/2006. The Examiner acknowledges the amendments to claims 1 and 5; the addition of new claim 9; and the amendments to the specification. Currently, claims 1-9 are pending.

Claim Rejections - 35 USC § 101

- 2. 35 U.S.C. 101 reads as follows:
 - Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.
- 3. Claims 1-8 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Methods that only manipulate abstract ideas or concepts are considered non-statutory subject matter. In the instant case, the method, as claimed, comprises the steps of providing a plurality of data, determining a treatment recommendation, and creating an output statement. This method does not cause a useful, tangible and concrete result that produces a practical application, and is therefore considered to be merely an abstract manipulation of information to create an output statement. An output statement comprising a treatment recommendation does not produce a practical application. It is simply further abstract manipulation of the treatment recommendation. The output statement is not even outputted. It is recommended that the claim be amended so that it provides a useful, tangible and concrete result to overcome this rejection. For example, a positive claim limitation such as --implanting a stent in the recommended location or implanting the recommended

Application/Control Number: 10/662,696 Page 3

Art Unit: 3736

number of stents-- would provide a useful, tangible and concrete result that produces a practical application. However, note that any new claim limitations must be properly supported in the original disclosure so as to avoid adding new matter. See MPEP 2106.

4. Claim 9 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Claim 9 is directed to an apparatus; however, the limitations of the claim are not directed to any physical structure of the apparatus. The means for determining a treatment recommendation and the means for generating an output statement appear to refer to the model disclosed in paragraph 30 of the specification. A model is an abstraction that is considered non-statutory subject matter because it does not constitute any physical structure. Therefore, because nothing more than an abstract model is claimed, the claim is non-statutory. Note that the original disclosure does not appear to disclose an apparatus with any physical structure and that the addition of structure to the application may constitute new matter.

Response to Arguments

5. In response to the Applicant's argument that claim 1 has been amended to overcome the 35 U.S.C. §101 rejection, the Examiner respectfully submits that the amendment is not sufficient to overcome the rejection as noted above.

Application/Control Number: 10/662,696 Page 4

Art Unit: 3736

Conclusion

- 6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).
- 7. A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
- 8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Apanius whose telephone number is (571) 272-5537. The examiner can normally be reached on Mon-Fri 8:30am-5pm.
- 9. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Max Hindenburg can be reached on (571) 272-4726. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
